The Comrade told the fascist attacks in which more than 50 people were murdered, most of them were elders and women without any possibility to defend themselves. He explains that the practices and the strategy of the attacks was planned from time and it was conducted with an army strategy. A method already saw during the putsch of Maidan

The situation in Ukraine after the coup of Maidan is very harsh, poverty and unemployment, growing, together with inflation to the overall growth of prices. At the same time the civil and democratic freedoms are systematically attacked with legal and illegal means, with the aim to stamp out any opposition to the reactionary regime and its allied EU.

The meetings were concluded by reaffirming the common intent to strengthen the class solidarity and the common struggle against fascism and the predatory War promoted by NATO countries.
