Solidarity Message with PAME and the Greek working class for the National General Strike on the 12th of November 2015.

, 12/11/2015

The European Regional Office of WFTU expresses its solidarity with PAME and the Greek working class for the National General Strike of November 12.

The workers of Greece face a brutal attack by the Capital, the Greek Government of SYRIZA and the European Union. The measures of the 3rd Memorandum will abolish their rights in social security; will bring new cuts in pensions and salaries. They also aim to cancel trade union rights and freedoms and the right to go on Strike.

The capitalists want the workers in Greece to accept the new slaughter, without resistance. That is why they use the Government of SYRIZA to cultivate disappointment and inaction to the people.

The Greek class trade union movement, PAME has called for militant response to the new attack. The General Strike in Greece can be a step forward for the counterattack of the working class.

The fight of PAME and the Greek working class is also fight of the European class trade union movement. The European Regional Office of WFTU expresses its solidarity with PAME and the Greek working class for the National General Strike of November 12 and calls all European trade union organizations, militant trade unionists to take initiatives of solidarity with the General Strike in Greece and send messages of Solidarity with the strike
