The NATO's July summit in Warsaw will resolute new dangerous plans for the working class

, 04/07/2016

The World Federation of Trade Unions conveys militant Greetings to the Workers of the world which are struggling against NATO and the imperialistic interventions. The NATO's July summit in Warsaw will resolute new dangerous plans for the working class.

The NATO is planning to establish new military bases in Japan and Greece. It gathers strong military forces in North Europe, Black Sea and Mediterranean Sea. USA and their allies are getting ready for new interventions against the workers in struggle, these interventions is the main reason for the refugees and immigrants.

We strongly believe that the people in every country must decide for their own present and future. WFTU demands the immediate dissolution of the NATO, today this position is of immediate priority for the international trade union movement.

On behalf of the 92 million members of the WFTU, we condemn the imperialistic interventions of NATO and we call upon the class oriented trade union movement, the people's movement, in every corner of the world to be alerted and fight against the new imperialist interventions which are planned.
