

Dear comrades of Naklyat –is
Dear comrades of Disk, comrades of Presidium of this important international conference

On behalf of the Italian Confederation USB Unione Sindacale di Base, I bring you the greetings and condolences of Italian workers for the huge loss suffered by the working class to the Turkish mine of Soma.

The three hundred one miners killed in the mine of Soma from the capital were our brothers and we have remember them during last our national demonstration on May 17 in Rome with a minute of silence observed by tens of thousands of Italian workers.

There are no accidents in the workplace, there are murders carried out by capital and their governments failing the most basic standards of safety and protection of workers, saving adaptation of the safety systems to modern technologies that do exist, trying to keep control and the complaint by the class-oriented trade unions, going so far as to dismiss those who fight for greater security.

Throughout the world the crimes of capital sow death and destruction among the working class around the world capitalist interests of the company are considered more important than protecting the health of workers. The levels of exploitation now become intolerable but the bosses and governments exploit the systemic crisis of capital to increase it constantly.

International institutions are hostage to the capital and do not fight to force the governments to adopt safety standards and are backed in this by the

collaborative unions. In the same way also the European Union is on the Governments and European bourgeoisie side.

European Union is working for abolish every workers rights and conquests, the most important too health and safety measures right.

Just in recent weeks we have launched a national campaign in Italy training for our union on health protection in the workplace. We have launched this important initiative by the biggest Italian steelmaker Ilva Taranto where have been many workplace homicides in recent years and the city of Taranto has also suffered many deaths from cancer due to pollution of the factory. In September we will continue throughout the transport sector.

Usb believes that it is the task of class oriented trade unions organized in WFTU have a strong attention to working conditions and the protection of the physical integrity of workers and lead a strong battle to defeat exploitation and hunger for profits of capital.

**WE NEITHER FORGET, WE NEITHER FORGIVE!
NO MORE BLOOD OF OUR BROTHERS FOR THE EMPLOYERS
PROFITS**
