No military intervention in Syria, the Syrians have to decide their own future

Roma, 28/08/2013

The National Executive USB strongly condemns the decision to create a military intervention in Syria using as a pretext the alleged use of chemical weapons in the battle taking place for over two years, and powered by evident geo political interest.

Once again the imperialist powers are going to intervene to bend to their own interests a strategic country for its geographical location and for the function that has played so far in the Middle East situation.

The USB has always declared their uncompromising opposition to the war, believes that not even the UN umbrella to justify a military interference in the internal affairs of a sovereign country and instead must be the male and female workers in each country to determine, with

their struggles, choices internal policies.
