USB subscription to the BDS campaign

, 31/05/2016

USB National Confederation Council gathered in Tivoli (Rome) on 29 May 2016 upon proposal of the International Department and subscribing to the call of the International Solidarity Conference with Palestine held in Ramhalla, promoted by WFTU and GUPW decides the formal adhesion of USB to the international BGS campaign against the Israel. USB National Council, convinced that such a campaign could have a relevant impact on the international landscape in view of increasing the democratic pression to stop crimes committed by the Israeli State against the Palestinian people, similarly to the success obtained by the BDS Campaign against the South African apartheid regime , invites all its organizations to support it starting with the boycott of the multinational Hewlett Packard which provides the Israeli State with control and oppression tools at check points and in the Israeli prisons .
